AUTHOR INDEX

Abbreviations: (B), Books; (C), Letters; (E), Editorial; (L), Literature; (M), Meetings; (N), News; (O), Opinion; (P), Perspectives

A

Abdulla, S., Alcohol: friend or foe to the cardiovascular system? (M) 9
Abdulla, S., Getting to the heart of gap junction pathology (M) 192
Abdulla, S., Noise-induced hearing loss: the future is hear (M) 284
Abdulla, S., Tuberculosis: milking the genome for drug targets and vaccines (M) 104
Agranov, G., see Lazarov-Spiegler, O. 337
Agrawal, B., Gendler, S.J. and Longenecker, B.M., The biological role of mucins in cellular interactions and immune regulation: prospects for cancer immunotherapy 397
Alberti, S., Distinguishing ulcerative colitis from autoimmunity (L) 188
Aldred, M.A., Electronic zoo blotting identifies a modifier gene for spinal muscular atropy (L) 463
Aldred, M.A., Modifying genes and retinitis pigmentosa (L) 53
Aldred, M.A., Shedding light on eye development (L) 372
Aldred, M.A., Therapy for CAG-repeat diseases (L) 187
Ali, A., see Vaira, D. 237
Alton, E.W.F.W., see Davies, J.C. 381
Alton, E.W.F.W., see Davies, J.C. 292
Amor, S., Layward, L. and van Noort, J.M., Multiple sclerosis: modelling the future (M) 328
Andrews, T.C. and Brooks, D.J., Advances in the understanding of early Huntington's disease using the functional imaging techniques of PET and SPET 532
Ash, S., see Karpas, A. 244
Ashall, F., see Ray, W.J. 151
Ashenden, L-M.A., see During, M.J. 485
Augustus, M., *Human Cytogenetic Cancer Markers* (B) 100

B

Bainbridge, D., see Karpas, A. 244
Baldini, A., see Lindsay, E.A. 350
Barnard, N.J., see Lutzker, S.G. 404
Barnes, P.J. and Lim, S., Inhibitory cytokines in asthma 452
Bishop, J.E., Regulation of cardiovascular collagen deposition by mechanical forces 69
Bonn, D., Collagen scaffold shows promise for regenerating torn knee cartilage (N) 96
Bonn, D., Commensal bacteria armed against biological warfare (N) 367
Bonn, D., Diagnosing weight disorders by measuring uncoupling proteins (N) 185
Bonn, D., Leukocyte depletion for leukaemia and multiple sclerosis (N) 508
Bonn, D., Mouse model sheds light on malnutrition in Down syndrome (N) 414
Bonn, D., New strategies to combat fungal infections (N) 50
Bonn, D., Protease inhibitors on trial for inflammatory bowel disease (N) 461
Bonn, D., Rapid diagnosis of equivocal appendicitis (N) 369
Bonn, D., Taking the p... therapeutic proteins from urine (N) 230
Bonn, D., Targeted immunosuppressant on trial for rheumatoid arthritis (N) 277
Bowles, N.E., see Wang, Q. 382
Brooksbank, C., 1998: year of the mouse? (E) 1
Brooksbank, C., A taste of the zeitgeist (M) 240
Brooksbank, C., Divide and conquer: understanding the natural history of cancer (M) 422
Brooksbank, C., Molecular medicine through the kaleidoscope (M) 146
Brooksbank, C., The new cardiology (M) 191
Brooksbank, R.A., A candidate gene for schizophrenia and bipolar disorder (L) 189
Brooksbank, R.A., The genetics of susceptibility to insulin-dependent diabetes: where are we now? (L) 417
Brophy, S., see Senior, K. 416
Buchwald, M., see Carreau, M. 201
Buckle, A-M., Immunodeficiency in chronic lymphocytic leukaemia – clues from CD154 (L) 7
Bui, T-H., see Jones, D.R.E. 10
Bustin, S.A. and Dorudi, S., Molecular assessment of tumour stage and disease recurrence using PCR-based assays 389
Bustin, S.A., Crosstalk among cancer signalling pathways (L) 511
Bustin, S.A., A new type of tumour suppressor gene: a serine/threonine kinase joins the list (L) 97
Bustin, S.A., Blocking angiogenesis disarms invasive tumours (L) 52
Bustin, S.A., Combining strategies to combat solid tumours (L) 371

C

Cameron, D.F., see Willing, A.E. 471
Campbell, L.A., see Kuo, C.C. 426
Caplen, N.J., Gene therapy: different strategies for different applications (M) 373
Caplen, N.J., Visualizing lipoplexes (L) 370
Caplen, N.J., TP53 on trial for cancer gene therapy (L) 465
Caplen, N.J., Lentiviral vectors: Aids for gene therapy (L) 51
Caplen, N.J., Mending mutations by *in vivo* site-directed mutagenesis (L) 188
Carreau, M. and Buchwald, M., Fanconi's anaemia: what have we learned from the genes so far? (R) 201
Caulfield, T., Reply to Ian Dunham (C) 336
Caulfield, T., The commercialization of human genetics: profits and problems (P) 148
Cawston, T., Matrix metalloproteinases and TIMPs: properties and implications for the rheumatic diseases 130
Cerottini, J-C., see Romero, P. 305
Chang, T.M.S. and Prakash, S., Therapeutic uses of microencapsulated genetically engineered cells 221

Chatenoud, L., Tolerogenic antibodies and fusion proteins to prevent graft rejection and treat autoimmunity 25
Chavany, C. and Jendoubi, M., Biology and potential strategies for the treatment of G_{M2} gangliosidoses 158
Clifton-Bligh, R.J., *Landmarks in Gene Regulation* (B) 236
Clifton-Bligh, R.J., *Endocrinology: Basic and Clinical Principles* (B) 12
Coffey, A., A new type of gene associated with hereditary deafness? (L) 52
Cole-Strauss, A., see Ye, S. 431
Collombet, J-M. and Coutelle, C., Towards gene therapy of mitochondrial disorders 31
Cooper, D.K.C., see Lanza, R.P. 39
Coutelle, C., see Collombet, J-M. 31

Davies, J.C., Geddes, D.M. and Alton, E.W.F.W., Prospects for gene therapy for cystic fibrosis: Erratum 381
Davies, J.C., Geddes, D.M. and Alton, E.W.F.W., Prospects for gene therapy for cystic fibrosis 292
de Villiers, W., Increasing the options for inflammatory bowel disease treatment? (L) 419
Diaz, R.M., see Vile, R.G. 84
Dorrell, S., Early warning cancer tests in development (N) 324
Dorrell, S., Muscling in on atherosclerosis (N) 460
Dorrell, S., New markers for cardiovascular disease (N) 415
Dorrell, S., Restoring interleukin 2 production in AIDS patients (N) 508
Dorrell, S., Selecting antibodies that block the HIV-1 coreceptor (N) 507
Dorrell, S., Towards the biosynthesis of an alternative to Taxol (N) 460
Dorudi, S., see Bustin, S.A. 389
Douglas, J.T., *Concepts in Gene Therapy* (B) 190
Dukepoo, F.C., The trouble with the human genome diversity project (C) 242
Dunham, I., Data disclosure in the Human Genome Project (C) 335
During, M.J. and Ashenden, L-M.A., Towards gene therapy for the central nervous system 485

E

Evans, K.L., An SH2 domain stands between infectious mononucleosis and a fatal lymphoproliferative disease (L) 510
Evans, K.L., Channelopathies: epilepsy joins the list (L) 417
Evans, K.L., Is too much stress bad for your brain? (L) 326
Evans, K.L., Ribozymes to the rescue? (L) 233
Exley, C., Does antiperspirant use increase the risk of aluminium-related disease, including Alzheimer's disease? (O) 107

F

Featherstone, C., Localized delivery of anti-cancer drugs by electroporation (N) 47
Feunteun, J., Breast cancer and genetic instability: the molecules behind the scenes 263
Ficazzola, M.A. and Taneja, S.S., Prospects for gene therapy in human prostate cancer 494
Frank, B., see Ye, S. 431
Freeman, T., *Differential Display Methods and Protocols* (B) 12
Fricker, J., A noninvasive prognostic indicator for bladder cancer (N) 506
Fricker, J., An ischaemic switch for gene therapy vectors (N) 183
Fricker, J., Combining strategies to improve non-viral vectors (N) 323
Fricker, J., Elastase inhibitor for detection and treatment of inflammation and infection (N) 5
Fricker, J., Hookworm anticoagulant safe in humans (N) 4
Fricker, J., Keratinocyte growth factor on trial for wound repair (N) 229
Fricker, J., Say NO to anal fissures (N) 94
Fricker, J., Tolerizing B cells to jump the first hurdle in xenotransplantation (N) 462
Fricker, J., Triplex DNA as a novel diagnostic tool (N) 140
Fricker, J., Tuning into plasma lipoproteins (N) 413

G

Galle, P.R., see Strand, S. 63
Gargus, J.J., Fantino, E. and Gutman, G.A., A piece in the puzzle: an ion channel candidate gene for schizophrenia (O) 518
Geddes, D.M., see Davies, J.C. 381
Geddes, D.M., see Davies, J.C. 292
Gendler, S.J., see Agrawal, B. 397
Giles, R.H., Unshrouding the human genome (M) 238
Giles, R.H., Unshrouding the human genome: Erratum 312
Gleadle, J.M. and Ratcliffe, P.J., Hypoxia and the regulation of gene expression 122
Goate, A.M., see Ray, W.J. 151
Gordon, J.W., Germline alteration by gene therapy: assessing and reducing the risks (O) 468
Günzburg, W.H., *Retroviruses* (B) 283
Gurwitz, D. and Kloog, Y., Do endogenous cannabinoids contribute to HIV-mediated immune failure? (O) 196
Gurwitz, D., A new handle on Alzheimer's amyloid toxicity (L) 7
Gurwitz, D., Haemorrhagic shock: endogenous cannabinoids to the rescue (L) 99
Gurwitz, D., New evidence for neuroprotection by estrogen (L) 281
Gurwitz, D., Non-viral gene transfer: liposomes and nanospheres promise to deliver the goods (L) 464
Gurwitz, D., Oxidative stress in Parkinson's disease: clues for new therapeutic directions (L) 371
Gurwitz, D., Uric acid may herald new hopes for multiple sclerosis patients (L) 144

H

Hata, A., Shi, Y. and Massagué, J., TGF-β signalling and cancer: structural and functional consequences of mutations in Smads 257
Hawthorne, M.F., New horizons for therapy based on the boron neutron capture reaction 174
Heuertz, R.M., *Proinflammatory and Antiinflammatory Peptides* (B) 375
Hewitt, C.R.A., Attraction and the single cell (L) 187
Hewson, R., Asymmetric release explains rotavirus pathogenesis (L) 6
Hewson, R., Borna disease virus takes the acid test (L) 142
Hewson, R., Retroviruses and xenotransplantation: determining the risks (L) 280
Hewson, R., Turning off the TAP: how HSV inhibits antigen presentation (L) 8
